

# Beaver County Project Recovery

Fact Sheet December 2011

## Annual Report Summary

Project Recovery envisions a System of Care (SOC) where all people can easily access a welcoming, effective, and efficient system of care that inspires hope and integrates treatment based on the needs of the individual, not the needs or conveniences of the system, and where individuals and families with lived experience have the opportunity to experience maximum success toward recovery or improved lifestyle. The purpose of this fact sheet is to provide some snapshots from the annual report for the first year (October 2010 through September 2011).

## System Results

- Four **Single Points of Accountability** (SPAs) were identified to coordinate services
  - Beaver County Behavioral Health Blended Case Management
  - Glade Run Blended Case Management
  - Heritage Valley Staunton Clinic's Community Treatment Team (CTT)
  - NHS's Forensic Assertive Community Treatment (FACT) Team
- A **core values survey** was developed to measure changes in knowledge, attitudes, and behaviors related to the core values to support mental health transformation goals from all system partners. (To be implemented in Year 2).
- **Twelve committees, subcommittees and workgroups met on a regular basis.** Committees and subcommittees focused on overarching system level issues. The workgroups focused on more specific system issues.
- The **structure for the electronic service plan (eSP) and website have been created** and will be operational in Year 2.
- **Five trainings were held.** Trainings were geared towards informing the provider system about **recovery-oriented services and trauma informed care** as well as teaching providers about **evidence based practices**<sup>1</sup> and the **basics of evaluation**.

Prepared by:  **HPW** ASSOCIATES, LLC

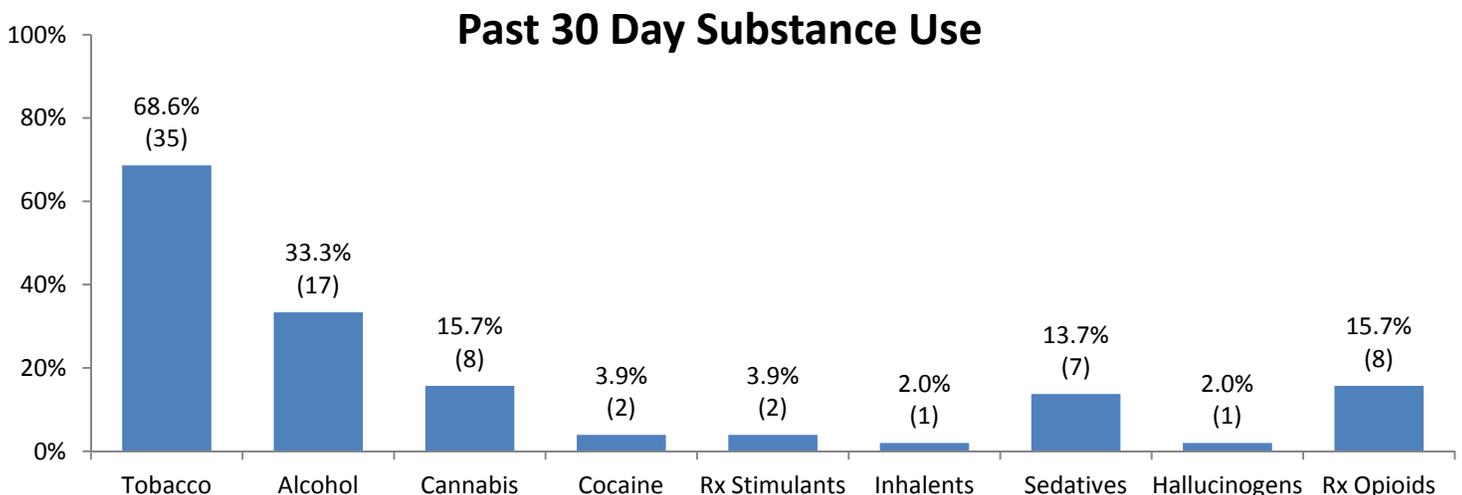

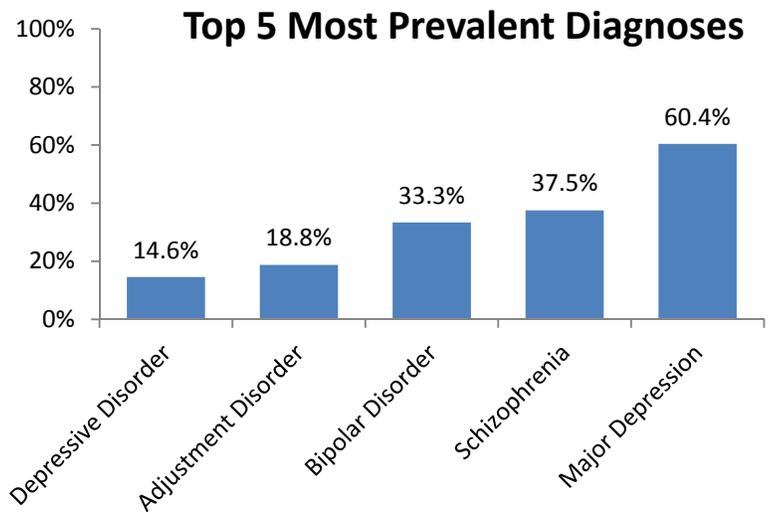

<sup>1</sup> The evidence-based practices are Seeking Safety, Supported Employment and Illness, Management and Recovery.

## Provider Results

- The evidence-based practice **Supported Employment**, an approach to vocational rehabilitation for people with serious mental illnesses, was provided by Beaver County Rehabilitation Center (BCRC) in Year 1. Twenty-seven individuals received this service.
- Baseline data was also collected from service providers and included:
  - A **Comprehensive, Continuous, Integrated System of Care (CCISC) survey**, which asked about the integration of co-occurring disorder (COD) values into agency policies, areas of quality improvement addressed, whether or not the COMPASS<sup>2</sup> had been measured, and about the presence and involvement of change agents.
  - Providers also completed a **Recovery Oriented Systems Indicators (ROSI) instrument**, which asks about the number of clients served per year, the types of services provided, and the number of staff working with clients.

## Consumer Results

- All enrollments were voluntary and data is self-reported.
- **Fifty-two consumers were enrolled** through the SPAs. These individuals completed the National Outcomes Measures (NOMs) and a Recovery Oriented System Indicators (ROSI) instrument.
- Mental health diagnoses were provided for 48 consumers through HealthChoices. Of these, **30 had multiple disorders**. 81.3% of these individuals do not have co-occurring disorders, and **18.8% have co-occurring disorders**.
- **70.6% own or rent their own home**
- **20.4% are employed**, and all of these individuals are employed part time. Another **20.4% are unemployed but looking for work**.
- The most frequently used substance is **tobacco**, followed by **alcohol**. **Cannabis** and **prescription opioids** were the most frequently used illegal substances.

<sup>2</sup> The COMPASS is an instrument designed to help programs conduct a self-assessment of their recovery-oriented co-occurring capabilities.
