

Did you know?

"In the first two weeks after a drug user is released from jail, the risk of a fatal overdose is much higher than at any other time in his addiction." (Vestal)

"After months or years in confinement ... an addict's tolerance for drugs is low but his craving to get high can be as strong as ever." (Vestal)

Vestal, Christine. "Helping Drug-Addicted Inmates Break the Cycle". Stateline. The Pew Charitable Trusts, 13 Jan. 2016

This doesn't have to happen to you!

You can ... follow through with treatment.

... find a sponsor.

... go to meetings.

... find out about Narcan®.

... contact one of the local resources below!
